Hudson Valley Chef's Table Julia Sexton 2014-06-17 Thousands of years before Hendrik Hudson sailed his Half Moon up to modern day Albany in 1609, the glaciers that once blanketed the Hudson Valley retreated to the Arctic. What the ice left in its wake was a soil so rich that, in global satellite images taken today, the trench of its path still shows up as a jet black streak. Lured by this soil's fertility came the family farmers of the Hudson Valley, who, over time, learned to glean the finest products that the land could provide. Today the Hudson Valley is an area rich in history and art, antiques and architecture, charming towns, and farms that produce bountiful local produce. America's history comes alive here as does its beauty. Naturally, Hudson Valley restaurants boast outstanding chefs with a deep and growing commitment to supporting local agriculture. Hudson Valley farmers and artisans fill out the menus with sustainable raised produce, meats, poultry, eggs, cheese, wine and other fine foods. It's creative cuisine at its best With over 80 recipes for the home cook from the state's most celebrated eateries and showcasing full-color photos featuring mouth-watering dishes, famous chefs, and lots of local flavor, Hudson Valley Chef's Table is a feast for the eyes as well as the palate. The delicious dishes featured here are personal histories—stories of people and place. Each recipe, chef profile, and photo tells its part of the story and magic of the Hudson Valley.

The Oxford Handbook of Cognitive Sociology Wayne H. Brekhus 2019-06-26 In recent years there has been a growing interest in cognition within sociology and other social sciences. Within sociology this interest cuts across various topical subfields, including culture, and social psychology, religion, race, and identity. Scholars within the new subfield of cognitive sociology, also referred to as the sociology of culture and cognition, are contributing to a rapidly developing body of work on how mental and social phenomena are interrelated and often interdependent. In The Oxford Handbook of Cognitive Sociology, Wayne H. Brekhus and Gabe Igantow have gathered some of the most influential scholars working in cognitive sociology to present an accessible introduction to key research areas in a diverse field. While classical sociological and newer interdisciplinary approaches have been covered separately by scholars in the past, this volume alternatively presents a broad range of cognitive sociological perspectives. The contributors discuss a range of approaches for theorizing and analyzing the "social mind," including macro-cultural approaches, interactionist approaches, and research that draws on Pierre Bourdieu's major concepts. Each chapter further investigates a variety of cognitive processes within these three approaches, such as attention and inattention, perception, automatic and deliberate cognition, cognition and social action, stereotypes, categorization, classification, judgment, symbolic boundaries, meaning-making, metaphor, embodied cognition, morality and religion, identity construction, time sequencing, and memory. A comprehensive look at cognitive sociology's main contributions and the central debates within the field, the Handbook can serve as a primary resource for social researchers, faculty, and students interested in how cognitive sociology can contribute to research within their substantive areas of focus.

Rebel Chef Dominique Crenn 2021-06-01 "Dominique Crenn is a hero to so many of us, both inside and out of the restaurant industry. She has unlimited courage to always follow her own path, to carve her own way in the world. This book, and Dominique's whole life, show that everything and anything is possible if you believe in yourself and you keep pushing forward, always forward." —José Andrés The inspiring and deeply personal memoir from highly acclaimed chef Dominique Crenn When Dominique Crenn decided to become a chef, she knew it was a near impossible dream in France where almost all restaurant kitchens were run by men. She left her home and everything she knew to move to San Francisco, and almost thirty years later was awarded three Michelin stars in 2018 for her influential restaurant Atelier Crenn, the first female chef in the United States to receive this honor—no small feat for someone who hadn't been formally trained. In Rebel Chef, Crenn tells of her untraditional coming-of-age as a chef. Adopted as a toddler, she didn't resemble her parents, and was haunted by a past she knew nothing about. But after years of working to fill this blank space, Crenn embraced the power her history gave her to be whoever she wants to be. In this disarmingly honest look at one woman's evolution from a daring young chef to a respected activist, Crenn reflects on the years she spent working in the male-centric world of professional kitchens and tracks her career from struggling cook to running one of the world's most celebrated restaurants. At once a tale of personal discovery and a tribute to unrelenting determination, Rebel Chef is the story of one woman making a place for herself in the kitchen, and in the world.

Globalizing Organic Rafi Groszlik 2021-02-01 Traces how alternative food movements are affected by global and local trends, with a focus on how organic agriculture was integrated in Israel. Globalizing Organic focuses on the globalization of a culture of "eating for change" and the ways in which local meanings attached to the production of foods embed ecological and social values. Rafi Groszlik examines how organic agriculture was integrated in Israel—a state in which agriculture was a key mechanism in promoting Jewish nationalism and in time has become highly mechanized and technologically sophisticated. He explores how organic food, which signifies environmental protection and social equity, has been realized in a country where environmental issues are perceived as less pressing compared to inner political conflicts, the Israeli-Arab conflict, and recurrent wars. Based on more than a decade of ethnographic fieldwork, interviews, and analysis of historical documents and media, Groszlik traces how alternative food movements are affected by global and local trends. He covers a wide range of topics, including the ethos of halutzim ("pioneers," Zionist ideological farmers and workers), the utopian visions of the Israeli kibbutz, indigeneity that is claimed both by Palestinians and Jewish settlers in the Gaza Strip and in the West Bank, biblical meanings that have been ascribed to environmental and countercultural ideas, the Americanization of Israeli society, and its neoliberalized economy. Rafi Groszlik is a Visiting Assistant Professor in the Department of Sociology and the Jewish Studies Program at the University of California, Davis. He received his PhD in sociology and anthropology from Ben-Gurion University of the Negev, Israel.

Culinary Creation James Morgan 2007-06-07 The book seeks not to present a detailed history and discussion, but instead is intended to provide the student with an appreciation of the idea that all cuisines of the world have something unique to offer to a menu. The author strongly believes that foods of other nations (and even other areas of the United States) are too often given short shrift by culture-bound students and chefs, and that every attempt should be made to open their minds to the unlimited possibilities available. The word "foodism" is introduced to refer to biases against foods outside your culture.

Bound by Creativity Hannah Wohl 2021-06-23 While our traditional view of creative work might lead us to think of artists as solitary visionaries, the creative process is in fact deeply social. From those trying to land their first solo show to those with dozens of museum exhibitions, artists are influenced by others' evaluations. In Bound by Creativity, sociologist Hannah Wohl draws on more than one hundred interviews and two years of ethnographic research in the New York contemporary art market, developing a sociological perspective on creativity through the analytic lens of judgment. Wohl takes readers into artists' studios and shares firsthand how they decide which works to leave unfinished, destroy, put into storage, or exhibit. Wohl then transports readers into the art world, examining the interactions in galleries, international art fairs, and collectors' homes that shape artists' understandings of their work. Wohl shows us how moments of judgment--whether by artists, curators, dealers, or collectors--reveal artistic practices to be profoundly sociological, both because artists' sensibilities are informed by their interactions with others, and because artists' decisions about their work affect the objects that circulate through the world. We see that judgment is an integral element of the creative process, resulting in the creation of distinctive and original works. Creativity, Wohl shows, rests on these highly social dynamics, and exploring it through this lens sheds new light on the production of cultural objects, markets, and prestige.

Contemporary Asian Artistic Expressions and Tourism Paolo Mura 2020-07-09 This book explores the relationship between tourism/tourists and expressions of contemporary Asian art (for example, artists, objects, intangible artistic productions, digital manifestations, etc) in Asian and non-Asian tourist spaces/experiences. Although the nexus between art and tourism has not been neglected in the literature, work on contemporary art and tourism is lacking, and this is particularly true within the context of non-Western societies. This volume creates a timely counterpoint to the existing dominance of a Western-centric body of knowledge in the area. The book considers how encounters between tourists and expressions of Asian contemporary art may produce possibilities for challenging, re-evaluating or reasserting crystallized frames of understanding and, as such, is of value to a multi-disciplinary audience.

Measuring Culture John W. Mohr 2020-08-11 Social scientists seek to develop systematic ways to understand how people make meaning and how the meanings they make shape them and the world in which they live. But how do we measure such processes? Measuring Culture is an essential point of entry for both those new to the field and those who are deeply immersed in the measurement of meaning. Written collectively by a team of leading qualitative and quantitative sociologists of culture, the book considers three common subjects of measurement—people, objects, and relationships—and then discusses how to pivot effectively between subjects and methods. Measuring Culture takes the reader on a tour of the state of the art in measuring meaning, from discussions of neuroscience to computational social science. It provides both the definitive introduction to the sociological literature on culture as well as a critical set of case studies for methods courses across the social sciences.

Culinary Nationalism in Asia Michelle T. King 2019-07-11 With culinary nationalism defined as a process in flux, as opposed to the limited concept of national cuisine, the contributors of this book call for explicit critical comparisons of cases of culinary nationalism among Asian regions, with the intention of recognizing patterns of modern culinary development. As a result, the formation of modern cuisine is revealed to be a process that takes place around the world, in different forms and periods, and not exclusive to current Eurocentric models. Key themes include the historical legacies of imperialism/colonialism, nationalism, the Cold War, and global capitalism in Asian cuisines; internal culinary boundaries between genders, ethnicities, social classes, religious groups, and perceived traditions/modernities; and global contexts of Asian cuisines as both nationalist and internationalist enterprises, and "Asia" itself as a vibrant culinary imaginary. The book, which includes a foreword from Krishnendu Ray and an afterword from James L. Watson, sets out a fresh agenda for thinking about future food studies scholarship.

Lateral Cooking Niki Segnit 2019-11-05 A groundbreaking handbook--the "method" companion to its critically acclaimed predecessor, The Flavor Thesaurus--with a foreword by Yotam Ottolenghi. Niki Segnit used to follow recipes to the letter, even when she'd made a dish a dozen times. But as she tested the combinations that informed The Flavor Thesaurus, she detected the basic rubrics that underpinned most recipes. Lateral Cooking offers these formulas, which, once readers are familiar with them, will prove infinitely adaptable. The book is divided into twelve chapters, each covering a basic culinary category, such as "Bread," "Stock, Soup & Stew," or "Sauce." The recipes in each chapter are arranged on a continuum, passing from one to another with just a tweak or two to the method or ingredients. Once you've got the hang of flatbreads, for instance, then its neighboring dishes (crackers, soda bread, scones) will involve the easiest and most intuitive adjustments. The result is greater creativity in the kitchen: Lateral Cooking encourages improvisation, resourcefulness, and, ultimately, the knowledge and confidence to cook by heart. Lateral Cooking is a practical book, but, like The Flavor Thesaurus, it's also a highly enjoyable read, drawing widely on culinary science, history, ideas from professional kitchens, observations by renowned food writers, and Segnit's personal recollections. Entertaining, opinionated, and inspirational, with a handsome three-color design, Lateral Cooking will have you torn between donning your apron and settling back in a comfortable chair.

At the Chef's Table Vanina Leschziner 2015-06-03 This book is about the creative work of chefs at top restaurants in New York and San Francisco. Based on interviews with chefs and observation in restaurant kitchens, the book explores the question of how and why chefs make choices about the dishes they put on their menus. It answers this question by examining a whole range of areas, including chefs' careers, restaurant ratings and reviews, social networks, how chefs think about food and go about creating new dishes, and how status influences their work and careers. Chefs at top restaurants face competing pressures to deliver complex and creative dishes, and navigate market forces to run a profitable business in an industry with exceptionally high costs and low profit margins. Creating a distinctive and original culinary style allows them to stand out in the market, but making the familiar food that many customers want ensures that they can stay in business. Chefs must make choices between these competing pressures. In explaining how they do so, this book uses the case study of high cuisine to analyze, more generally, how people in creative occupations navigate a context that is rife with uncertainty, high pressures, and contradicting forces.

Mix & Mash 2017 "This cookbook is the continuation of an idea implemented back in 2013 of inviting the culinary creativity of local chefs into the brewing world. Their knowledge and expertise have been utilized to build and brew different recipes with our brewers throughout the years. These collaborative efforts showcase just how versatile beer is with each and every concoction while simultaneously building community and fostering new partnerships. Now we've taken it a step further with this cookbook by providing food recipes that the chefs put together using MadTree beer as one of the ingredients in each dish. This book also contains home brew recipes to make a beer to pair or use with each recipe"--Page 3.

Table Lands Kara K. Keeling 2020-06-15 Food is a signifier of power for both adults and children, a sign of both inclusion and exclusion and of conformity and resistance. Many academic disciplines--from sociology to literary studies--have studied food and its function as a complex social discourse, and the wide variety of approaches to the topic provides multidisciplinary frames for understanding the construction and uses of food in all types of media, including children's literature. Table Lands: Food in Children's Literature is a survey of food's function in children's texts, showing how the sociocultural contexts of food reveal children's agency. Authors Kara K. Keeling and Scott T. Pollard examine texts that vary from historical to contemporary, noncanonical to classics, and Anglo-American to multicultural traditions, including a variety of genres, formats, and audiences: realism, fantasy, cookbooks, picture books, chapter books, YA novels, and film. Table Lands offers a unified approach to studying food in a wide variety of texts for children. Spanning nearly 150 years of children's literature, Keeling and Pollard's analysis covers a selection of texts that show the omnipresence of food in children's literature and culture and how they vary in representations of race, region, and class, due to the impact of these issues on food. Furthermore, they include not only classic children's books, such as Winnie-the-Pooh, but recent award-winning multicultural novels as well as cookbooks and even one film, Pixar's Ratatouille.

The Cultural Politics of Food, Taste, and Identity Steffan Igor Ayora-Diaz 2021-04-08 The Cultural Politics of Food, Taste, and Identity examines the social, cultural, and political processes that shape the experience of taste. The book positions flavor as involving all the senses, and describes the multiple ways in which taste becomes tied to local, translocal, glocal, and cosmopolitan politics of identity. Global case studies are included from Japan, China, India, Belize, Chile, Guatemala, the United States, France, Italy, Poland and Spain. Chapters examine local responses to industrialized food and the heritage industry, and look at how professional culinary practice has become foundational for local identities. The book also discusses the unfolding construction of "local taste" in the context of sociocultural developments, and addresses how cultural political divides are created between meat consumption and vegetarianism, innovation and tradition, heritage and social class, popular food and authenticity, and street and restaurant food. In addition, contributors discuss how different food products--such as kimchi, quinoa, and Soylent--have entered the international market of industrial and heritage foods, connecting different places and shaping taste and political identities.
