Monsoon Islam Sebastian R. Prange 2018-05-03 Between the twelfth and sixteenth centuries, a distinct form of Islamic thought and practice developed among Muslim trading communities of the Indian Ocean. Sebastian R. Prange argues that this 'Monsoon Islam' was shaped by merchants not sultans, forged by commercial imperatives rather than in battle, and defined by the reality of Muslims living within non-Muslim societies. Focusing on India's Malabar Coast, the much-fabled 'land of pepper', Prange provides a case study of how Monsoon Islam developed in response to concrete economic, socio-religious, and political challenges. Because communities of Muslim merchants across the Indian Ocean were part of shared commercial, scholarly, and political networks, developments on the Malabar Coast illustrate a broader, trans-oceanic history of the evolution of Islam across monsoon Asia. This history is told through four spaces that are examined in their physical manifestations as well as symbolic meanings: the Port, the Mosque, the Palace, and the Sea. *International Directory of Arts 2013* Walter de Gruyter & Co 2012 The 37th edition of International Directory of Arts (IDA) contains more about 150,000 addresses (including telephone and fax numbers, eMail and URL) from all over the world: Museums and Public Galleries Universities, Academies, Schools Associations Art and Antique Trade, Numismatics Art and Antiques Fairs Galleries Auctioneers Restorers Art Publishers Art Journals Antiquarians and Art Booksellers Within each chapter, addresses are arranged by country and within country, sections are set our alphabetically by city. The Currency of Empire Jonathan Barth 2021-06-15 In *The Currency of Empire*, Jonathan Barth explores the intersection of money and power in the early years of North American history, and he shows how the control of money informed English imperial action overseas. The export-oriented mercantile economy promoted by the English Crown, Barth argues, directed the plan for colonization, the regulation of colonial commerce, and the politics of empire. The imperial project required an orderly flow of gold and silver, and thus England's colonial regime required stringent monetary regulation. As Barth shows, money was also a flash point for resistance; many colonists acutely resented their subordinate economic station, desiring for their local economies a robust, secure, and uniform money supply. This placed them immediately at odds with the mercantilist laws of the empire and precipitated an imperial crisis in the 1670s, a full century before the Declaration of Independence. *The Currency of Empire* examines what were a series of explosive political conflicts in the seventeenth century and demonstrates how the struggle over monetary policy prefigured the patriot reaction to the Stamp Act and so-called Intolerable Acts on the eve of American independence. Thanks to generous funding from the Arizona State University and George Mason University, the ebook editions of this book are available as Open Access (OA) volumes from Cornell Open (cornelopen.org) and other Open Access repositories.

The Sahara Jeremy Keenan 2013-10-18 This collection examines the Sahara holistically from the earliest (prehistoric) times through the 'historical' period to the present and with political direction into the future. The contributions cover palaeoclimatology, history, archaeology (cultural heritage), social anthropology, sociology, politics and international affairs. Structured chronologically, the volume can almost be read as a narrative of the Sahara from the earliest times to the present, i.e. from the past climates of the Sahara in prehistoric times to the current 'war on terror' and its implications for the peoples of the Sahara. Importantly, the collection shows how the region must be approached 'holistically', highlighting the importance of each of these subject areas (palaeo-climates, history, politics, etc.) in relation to each other. Indeed, the first contribution is a remarkable (and unique) paper, bringing together the work of some 8-9 internationally recognised scientists to tell the story and show the relevance to the present day of the Sahara's past climates etc. Nearly all the contributions stand in their own right at the cutting edge of research in their respective fields (e.g. archaeology, history, politics, etc.). This book was previously published as a special issue of the *Journal of North African Studies*.

Desert Truffles Varda Kagan-Zur 2013-10-30 Desert truffles are found in every known desert, irrespective of the habitat – cool or hot, loamy or acidic, sandy or heavy soil – the only common condition seems to be a limited supply of water. In contrast to 'true' truffles, desert truffles have evolved over time in different families, mainly within the order Pezizales. While in some arid areas, desert truffles have been traditionally used as food, in most regions interest has only recently been increasing, and truffles are now treasured for their nutritional value, as an income source and for research. This volume gives a comprehensive overview of the phylogeny, biology, mycorrhizal association, and distribution of desert truffles, their use, biochemical and medicinal properties, as well as their domestication and cultivation.

Rough Waters Silvia Marzagalli 2017-10-18 This study analyses the presence of American ships, merchants, and interests in the Mediterranean region in the first decades following the independence of the United States, and seeks to understand whether or not the English, Dutch, Scandinavians, and Americans invaded the region and its shipping industry in the eighteenth and nineteenth centuries. It considers the following topics: the benefit of American neutrality during the French Revolutionary wars which enabled the growth of their shipping activities; the organisation of protection for American ships post-independence, particularly from Barbary privateers; the diplomatic efforts of John Adams and Thomas Jefferson and the relationships of convenience fostered by American powers when requesting European assistance; the development of American consular services to assist merchants and captains; the avoidance of incidents through peace and commercial treaties through to ship seizures and crew enslavement; and the impact of the Tripolitanian War (or Barbary War) on American-Mediterranean shipping. The works in this volume attempt to determine whether or not these actions can be considered an 'invasion'. They explore the mutually beneficial aspects of American-Mediterranean trade whilst also considering the strength of the Mediterranean trade (particularly Greek) prior to American interference. It concludes by confirming the dual objectives of the American presence - to ensure open markets for their goods, and to enhance their political and military power against British, French, and North African regencies.

African Voices on Slavery and the Slave Trade: Volume 1, The Sources Alice Bellagamba 2013-05-13 Though the history of slavery is a central topic for African, Atlantic world and world history, most of the sources presenting research in this area are European in origin. To cast light on African perspectives, and on the point of view of enslaved men and women, this group of top Africanist scholars has examined both conventional historical sources (such as European travel accounts, colonial documents, court cases, and missionary records) and less-explored sources of information (such as folklore, oral traditions, songs and proverbs, life histories collected by missionaries and colonial officials, correspondence in Arabic, and consular and admiralty interviews with runaway slaves). Each source has a short introduction highlighting its significance and orienting the reader. This first of two volumes provides students and scholars with a trove of African sources for studying African slavery and slave trade.

A more satisfactory answer calls for an awareness of how math is applied in many specific areas.
