Mayo Clinic Critical Care Case Review Rahul Kashyap MBBS 2016-06-23
Mayo Clinic Critical Care Case Review is a unique compellation of cases

presented at the highly rated Mayo Clinic Clinical Pathological Case (CPC) Conference. Designed to cover rare cases in a short amount of time, these reviews are set up in what is called the "unknown" format: highlighting the clinically key elements of the patient's hospital course, singling out the diagnostic dilemmas, and concludes with a question and answer format that allows clinicians to take home relative points for clinical practice. Written by practicing intensivists and critical care fellows for practicing intensivists and critical care fellows, this book combines interesting reading experiences with critical care medicine review. Each chapter ends with questions and answers that provide a board style review for the readers. Each case begins on the left-hand page with the discussion on the right, written succinctly to provide quick diagnostic understanding. While most critical care review books focus solely on an organ-system format, Mayo Clinic Critical Care Case Review captures the spirit of the CPC Conference in its text and illustrations.

Regenerative Biology of the Spine and Spinal Cord Rahul Jandial

2013-04-13 Editors hope that *Regenerative Biology of the Spine and Spinal Cord* appeals to the nostalgic sentiments of investigators and intellectuals in that it can be held in hand and provide a broad survey of leading edge science. At the same time its chapters can be digitally acquired for those established in the field to refine particular knowledge interests or gaps. Most importantly, we ask the reader, whomever that may be, to peruse without prejudice as countless more chapters will have been written before total spinal regeneration is achieved.

Out of Time Rahul Rao 2020-03-09 Between 2009 and 2014, an anti-

homosexuality law circulating in the Ugandan parliament came to be the focus of a global conversation about queer rights. The law attracted attention for the draconian nature of its provisions and for the involvement of US evangelical Christian activists who were said to have lobbied for its passage. Focusing on the Ugandan case, this book seeks to understand the encounters and entanglements across geopolitical divides that produce and contest contemporary queerphobias. It investigates the impact and memory of the colonial encounter on the politics of sexuality, the politics of religiosity of different Christian denominations, and the political economy of contemporary homophobic moral panics. In addition, *Out of Time* places the Ugandan experience in conversation with contemporaneous developments in India and Britain--three locations that are yoked together by the experience of British imperialism and its afterlives. Intervening in a queer theoretical literature on temporality, Rahul Rao argues that time and space matter differently in the queer politics of postcolonial countries. By employing an intersectional analysis and drawing on a range of sources, Rao offers an original interpretation of why queerness mutates to become a metonym for categories such as nationality, religiosity, race, class, and caste. The book argues that these mutations reveal the deep grammars forged in the violence that founds and reproduces the social institutions in which queer difference struggles to make space for itself.

MANAGING SEVA (SELFLESS SERVICE) IN TIMES OF GREAT CHANGE

Rahul M. Jindal, MD, Ph.D 2015-11-13 The first part of the book gives practical aspects of performing seva in the USA, India and Guyana, South America. I give case histories from my own experience and how I navigated the turbulent waters to deliver what we set out to accomplish. I hope that our team's work will motivate others to understand the difficulties and find solutions to fulfilling the goal of seva. At the end, we could not achieve anything without the help of dedicated team members many of whom gave up their vacations and willingly gave their money and energy to make a difference. The second part of the book examined 5 case studies of our work dealing with kidney and corneal transplants in Guyana, blood and bone marrow drives in the USA under the auspices of the Hindu Mandir Executive Committee, distance learning in the UK and the Global Energy Parliament, Kerala, India. The third part of the book gives cautionary lessons in managing seva projects across the world. The fourth part of the book gives theoretical aspects of seva, which include social networks in management of complex missionary projects, the use of social networking technology in the promotion and scaling up of complex global health initiatives, the growing phenomenon of "voluntourism" and Distance Learning. Our case histories represent a variety of situations across continents. Having initiated and carried these projects from scratch to

fruition has given us an insight into the many issues others may face when they initiate their own projects. We experienced frustration at many points in the trajectory of our projects; however, we persevered and perhaps achieved modest success. We should confess that we thought of abandoning and giving up at multiple stages of our projects, however, we were reminded of the beneficiaries and continued against many odds and obstacles. Some of these could have been prevented but others were inevitable.

Globalization and Deregulation Rahul Mukherji 2014-05-22 Globalization and Deregulation makes a contribution to the literature on economic change by exploring the institutional transition from state-led import substitution to deregulation and globalization in the world's most populous democracy-India. It proposes a largely internally driven 'tipping-point' model of economic change, which is in sharp contrast to the 'punctuated equilibrium' model of sudden exogenous shocks that drive transformations. Indian economists have provided excellent arguments about the need for change and have described changes that have occurred. This literature is essential for understanding how new economic ideas are born. But it does not explain the process of economic change, which is a political process. The best accounts of India's political economy explain why the institutions of government intervention within a closed economy were locked in a closed economy model. These accounts reveal why the dominant interest groups made political demands with substantial fiscal consequences. They do not engage with the issue of change. This book fills that gap by seriously engaging with India's economic history and the literature on institutional change. It is a contribution both to India's economic history

and to systematic ways of thinking about economic change.

Ideology and Identity Pradeep K. Chhibber 2018-08-24 Indian party

politics, commonly viewed as chaotic, clientelistic, and corrupt, is nevertheless a model for deepening democracy and accommodating diversity. Historically, though, observers have argued that Indian politics is non-ideological in nature. In contrast, Pradeep Chhibber and Rahul Verma contend that the Western European paradigm of "ideology" is not applicable to many contemporary multiethnic countries. In these more diverse states, the most important ideological debates center on statism—the extent to which the state should dominate and regulate society—and recognition—whether and how the state should accommodate various marginalized groups and protect minority rights from majorities. Using survey data from the Indian National Election Studies and evidence from the Constituent Assembly debates, they show how education, the media, and religious practice transmit the competing ideas that lie at the heart of ideological debates in India.

Full Spectrum Dominance Rahul Mahajan 2002-11-05 In this compelling

big-picture assessment of the U.S. war on Iraq, Mahajan combines his experience as an anti-Iraq sanctions activist with a keen analysis of U.S. foreign policy in the post-Cold War era to provide the analysis that has been overlooked in the mainstream debate. Situating Iraq within the larger context of post-9/11 foreign policy, he analyzes the Bush National Security Strategy and the new neoconservative vision of achieving increasing degrees of global domination and control. Presented with unflinching clarity, Mahajan's research demonstrates that the war on Iraq was part of a much larger plan, assembled before 9/11 and, as stated by the Project for a New American Century, needing only a "new Pearl Harbor" to implement it.

India and Civilizational Futures Vinay Lal 2019-07-10 This second volume based on the deliberations of the Backwaters Collective puts into serious question the most familiar categories that have informed humanistic inquiry and social science research until now. The contributors probe how the

intellectual and cultural resources of Indic civilization might be deployed to introduce greater plurality into the world of modern knowledge systems and reinitiate metaphysics into the discourses of politics, with the hope that similar inquiries will in future be extended across the Global South. The chapters offer newer perspectives on India's past and intellectual traditions and suggest how we might liberate ourselves from the straightjackets of history, development, normal politics, the nation-state, and what globally passes for 'common sense' in various spheres of life and thought. While some contributors engage with a few figures who have been critical in shaping India's intellectual life, such as Kabir, Narayana Guru, Ambedkar, Tagore, and Gandhi, others bring into the limelight equally compelling if somewhat neglected figures such as Rahul Sankrityayan, Ranade, and T.R.V. Murti. Conceptual papers on intercommunalism, South Asian ideas of hospitality, and mnemocultural modes of learning complete the volume.

Oxford Textbook of Geriatric Medicine Jean-Pierre Michel 2017-12-14 Over the past two decades there has been a marked change in global age demographics, with the number of over-60s increasing by 82% and the number of centenarians by 715%. This new-found longevity is testament to the success of recent advances in medicine, but poses significant challenges to multiple areas of health care concerning older patients. Building upon its predecessor's reputation as the definitive resource on the subject, this new edition of the *Oxford Textbook of Geriatric Medicine* offers a comprehensive and multinational examination of the field. Fully revised to reflect the current state of geriatric medicine, it examines the medical and scientific basis of clinical issues, as well as the ethical, legal, and socio-economic concerns for healthcare policy and systems. Third World Protest Rahul Rao 2010-07-08 If boundaries protect us from

threats, how should we think about the boundaries of states in a world where threats to human rights emanate from both outside the state and the state itself? Arguing that attitudes towards boundaries are premised on assumptions about the locus of threats to vital interests, Rahul Rao digs beneath two major normative orientations towards boundaries- cosmopolitanism and nationalism-which structure thinking on questions of public policy and identity. Insofar as the Third World is concerned, hegemonic versions of both orientations are underpinned by simplistic imageries of threat. In the cosmopolitan gaze, political and economic crises in the Third World are attributed mainly to factors internal to the Third World state with the international playing the role of heroic saviour. In Third World nationalist imagery, the international is portrayed as a realm of neo-imperialist predation from which the domestic has to be secured. Both images capture widely held intuitions about the sources of threats to human rights, but each by itself provides a resolutely partial inventory of these threats. By juxtaposing critical accounts of both discourses, Rao argues that protest sensibilities in the current conjuncture must be critical of hegemonic variants of both cosmopolitanism and nationalism. The second half of the book illustrates what such a critique might look like. Journeying through the writings of James Joyce, Rabindranath Tagore, Edward Said and Frantz Fanon, the activism of 'anti-globalisation'

protesters, and the dilemmas of queer rights activists, Rao demonstrates that important currents of Third World protest have long battled against both the international and the domestic, in a manner that combines nationalist and cosmopolitan sensibilities.
