The Army and Politics in Indonesia Harold A. Crouch 2007 A comprehensive description of the Indonesian Army's history of political involvement. Crouch's incredible knowledge of so many facets of intrigue and manipulation, of names, dates, enemies and friends, and specific circumstances under which each attempted coup and counter effort was made if phenomenal. His attention to the supporting literature and his own personal experiences in-country certainly would indicate that Mr. Crouch is a - if not the

- leading expert in this complex and bewildering subject. Highly recommended. - Perspective: Reviews of New Books in Political Science The author has produced the most thorough and balanced account of contemporary Indonesian politics yet to appear in print. - Canadian Journal of Political Science A valuable contribution to our knowledge of modern Indonesia. - Journal of Southeast Asian Studies In this highly-respected work, Harold Crouch analyzes the role of the Indonesian Army in that country's politics, putting special emphasis on the Sukarno years, the gradual takeover of power by the military, and the

nature of Suharto's New Order government. The Army and Politics in Indonesia is now updated with a new preface and epilogue that expands the book's coverage to the 1980s. HAROLD CROUCH is a Senior Fellow in the Department of Political and Social Change, Research School of Pacific and Asian Studies, Australian National University where his research is concerned with Southeast Asian politics. He taught political science at the University of Indonesia in Jakarta from 1968 to 1971 and in the Department of Political Science at the National University of Malaysia from 1976 to 1990.

Her Tender Tyrant Elizabeth Lennox 2014-12-19 Marcus moved through life expecting everything to be logical.

Science could explain everything and he'd learned to make enormous profits understanding science. So when he runs into the illogical Juliette, his mind has a hard time understanding why she would walk down the street singing and dancing. There wasn't any music! But no matter how much he craved logic and reason, his body craved Juliette more. Juliette is fascinated by Marcus's stoicism. How could he walk down the street and not feel the joy in the sunshine? How could he ignore the sounds of the grasshoppers and birds? Or smile at the perfection of a flower? And how could her mind and body need a man

who didn't understand the joy of living life for the moment? Enjoy the fifth book in The Alfieri Saga!

Red Eagles Steve Davies

2008-09-23 From the late 1960s until the end of the Cold War, the United States Air Force acquired and flew Russian-made MiG jets, culminating in a secret squadron dedicated to exposing American fighter pilots to enemy technology and tactics. Red Eagles tells the story of this squadron from the first tests of MiGs following the Vietnam War when the USAF had been woefully under-prepared in aerial combat. These initial flights would develop into the "black" or

classified program known internally as Constant Peg. At a secret air base in Nevada, ace American fighter pilots were presented with a range of different MiG jets with a simple remit: to expose "the threat" to as many of their brethren as possible. Maintaining and flying these "assets" without spare parts or manuals was an almost impossible task, putting those flying the MiGs in mortal danger on every flight. Despite these challenges, in all more than 5,900 American aircrews would train against America's secret MiGs, giving them the skills they needed to face the enemy in real combat situations. For the first time, this

book tells the story of Constant Peg and the 4477th Red Eagles Squadron in the words of the men who made it possible.

The Business Affairs of Mr

Julius Caesar Bertolt Brecht
2016-01-28 Bertolt Brecht's
extraordinary historical novel
presents an aspiring scholar's
efforts to write an idealized life
of Julius Caesar twenty years
after his death. But the historian
abandons his planned
biography, confronted by a
baffling range of contradictory
views. Was Caesar an
opportunist, a permanently
bankrupt businessman who
became too big for the banks to
allow him to fail – as his former
banker claims? Did he stumble
into power while trying to make
money, as suggested by the
diary of his former slave?
Across these different versions
of Caesar's career in the

political and economic life of
Rome, Brecht wryly contrasts
the narratives of imperial
progress with the reality of
grasping self-interest, in a sly
allegory that points to the
Weimar Republic and perhaps
even to our own times. Brecht
reminds his readers of the need
for constant vigilance and
critical suspicion towards the
great figures of the past. In an
echo of his dramatic theories,
the audience is confronted with
its own task of active
interpretation rather than
passive acceptance -- we have
to work out our own views
about Mr Julius Caesar. This
edition is translated by Charles
Osborne and features an

introduction and editorial notes
by Anthony Phelan and Tom
Kuhn.

Wind, Water, Work Adam Lucas 2006 This book is the most comprehensive empirical study to date of the social and technical aspects of milling during the ancient and medieval periods. Drawing on the latest archaeological evidence and historical studies, the book

examines the chronological development and technical details of handmills, beast mills, watermills and windmills from the first millennium BCE to c. 1500. It discusses the many and varied uses to which mills were turned in the civilisations of Rome, China, Islam and Europe, and the many types of mill that existed. The book also includes comparative regional studies of the social and economic significance of milling, and tackles several important historiographical issues, such as whether technological stagnation was a characteristic of late Antiquity, whether there was an industrial revolution" in the European Middle Ages

based on waterpower, and how contemporary studies in the social shaping of technology can shed light on the study of pre-modern technology."

Tupolev Tu-16 Badger Yefim

Gordon 2004-06-21 The establishment of NATO posed the need for the Soviet war machine to create a fast jet bomber capable of reaching targets throughout Western Europe and combatting the carrier task forces with which the US Navy could throw its

weight around the world. The basic Tu-16 which first flew in the mid-1950s was developed into nearly 50 versions adopted for various roles, including nuclear-capable bombers, anti-shiping missile strike aircraft, torpedo-bombers and minelayers, numerous reconnaissance and ECM variants, assorted development aircraft for testing new engines, avionics and systems. The Tu-16 even found civil uses as a fast mailplane and a weather research/rainmaking aircraft!

The Badger, as the bomber was known to the West, served as the basis for the Soviet Union's first jet airliner, the Tu-104. The nearly 1,500 Tu-16s built in the

Soviet Union were an important factor in preventing all-out military confrontation between the East and the West. Since the mid-1950s and until the 1980s the Badger has been a regular picture on the pages of the Western press, snooping around Western naval groups every now and then. The type also had its share of 'hot' wars, getting its baptism of fire in the Six-Day War of 1967. Apart from three factories in the USSR, the Tu-16 was built under license in China as the H-6 and remains in service with the People's Liberation Army Air Force. Other foreign users were Egypt, Indonesia and Iraq. All known versions are described

and a full account is given of the Tu-16's operational career in the USSR and abroad during the Cold War and in the days after that when many of the surviving Badgers were used as target drones. The book features many previously unpublished photos and a detailed production list.

PCB Design for Real-World EMI

Control Bruce R. Archanbeault

2013-06-29 Proper design of printed circuit boards can make the difference between a product passing emissions requirements during the first cycle or not. Traditional EMC design practices have been simply rule-based, that is, a list of rules-of-thumb are presented

to the board designers to implement. When a particular rule-of-thumb is difficult to implement, it is often ignored. After the product is built, it will often fail emission requirements and various time consuming and costly add-ons are then required. Proper EMC design does not require advanced degrees from universities, nor does it require strenuous mathematics. It does require a basic understanding of the underlying principles of the potential causes of EMC emissions. With this basic understanding, circuit board designers can make trade-off decisions during the design phase to ensure optimum EMC

design. Consideration of these potential sources will allow the design to pass the emissions requirements the first time in the test laboratory. A number of other books have been published on EMC. Most are general books on EMC and do not focus on printed circuit board is intended to help EMC engineers and design design. This book engineers understand the potential sources of emissions and how to reduce, control, or eliminate these sources. This book is intended to be a 'hands-on' book, that is, designers should be able to apply the concepts in this book directly to their designs in the real-world.

The Moments We Stand Ashlee

Birk 2014-07-30 My name is Ashlee. I am a victim of murder.

Through a series of events and by two shots of a gun, I was made a widow at the age of 28, with my youngest child just six weeks old. I am a victim of infidelity. I have felt unlovable. I have felt rejected. I have had days in my life when I wasn't sure if I would ever take a breath again, let alone be able to raise my five children by myself. I have lived in fear. I have felt much heartache. I have felt truly broken to my core. I have carried some heavy burdens...not only of my own, but burdens put upon my shoulders by the death of my husband. I have felt alone. I have felt humiliated. I have been humbled to my knees. I

have searched my soul to find my worth in this world, and in the life that was left for me. My world has been totally shattered. I have faced realities I never knew were possible, and found strength within myself to keep up the fight and live every day as if it was on purpose. I have been carried by Angels...both earthly beings and those unseen. I have found that being a "victim" doesn't mean we have an excuse to stop living. Being a victim means finding a reason for seeking a higher road. I have picked up the pieces left and carried on. I am a mother. We are survivors. In one way or another, we are all victims. There are times in

our lives when we are forced to question who we are at our core. When we are presented with a path...we can go this way or we can choose that way. For some, this moment comes when the one person whom we love the most decides we are not enough. This person leave us-at a most vulnerable moment-alone to search within ourselves for who we really are. We are left trying to find who it is that was left behind.

Sometimes the person we love dies. Sometimes it is merely an internal battle we are facing...all alone inside our minds.

Whatever the situation and wherever you have been...you have been hurt. You have felt

alone. You have been abandoned, either by your parents, your lover, your friends, complete strangers, or even yourself. We have all been at that crossroad where all we have left is ourselves.

Sometimes these moments of lows have brought you to your knees and caused you to reflect and ponder your relationship with God...and other times they have made you question if He is even there, or if He knows you are alone. Whatever that moment has been for you, it is personal and real. It has defined and refined who you are, who you think you were, and who you want to become.

This is my story...the defining

moments that have truly brought me to my knees, the times when I've questioned to my core my very existence, and the experiences I've had that have shown me who I really am and who my Heavenly Father still needs me to become. The night of my husband's death was my darkest hour, but also the very moment when I saw firsthand that my Heavenly Father sent Angels on errands for me. He carried me. It was the hour when all my fears and all the pain of this world collided together and He was there...putting back together all the pieces, one step at a time.
