What Got You Here Won't Get You There Marshall Goldsmith 2010-09-03 Your hard work is paying off. You are doing well in your field. But there is something standing between you and the next level of achievement. That something may just be one of your own annoying habits. Perhaps one small flaw - a behaviour you barely even recognise - is the only thing that's keeping you from where you want to be. It may be that the very characteristic that you believe got you where you are - like the drive to win at all costs - is what's holding you back. As this book explains, people often do well in spite of certain habits rather than because of them - and need a "to stop" list rather than one listing what "to do". Marshall Goldsmith's expertise is in helping global leaders overcome their unconscious annoying habits and become more successful. His one-on-one coaching comes with a six-figure price tag - but in this book you get his great advice for much less. Recently named as one of the world's five most-respected executive coaches by Forbes, he has worked with over 100 major CEOs and their management teams at the world's top businesses. His clients include corporations such as Goldman Sachs, Glaxo SmithKline, Johnson and Johnson and GE.

The Shame of Poverty Robert Walker 2014-07-10 The Shame of Poverty invites the reader to question their understanding of poverty by bringing into close relief the day-to-day experiences of low-income families living in societies as diverse as Norway and Uganda, Britain and India, China, South Korea, and Pakistan. The volume explores Nobel laureate Amartya Sen's contention that shame lies at the core of poverty. Drawing on original research and literature from many disciplines, it reveals that the pain of poverty extends beyond material hardship. Rather than being shameless, as is often claimed by the media, people in poverty almost invariably feel ashamed at being unable to fulfil their personal aspirations or to live up to societal expectations due to their lack of income and other resources. Such shame not only hurts, adding to the negative experience of poverty, but undermines confidence and individual agency, can lead to depression and even suicide, and may well contribute to the perpetuation of poverty. Moreover, people in poverty are repeatedly exposed to shaming by the attitudes and behaviour of the people they meet, by the tenor of public debate that either dismisses them or labels them as lazy and in their dealings with public agencies. Public policies would be demonstrably more successful if, instead of stigmatising people for being poor, they treated them with respect and sought actively to promote their dignity. This book, together with the companion volume Poverty and Shame: Global Experiences, presents comparable evidence from the seven countries, challenges the conventional thinking that separates discussion of poverty found in the Global North from that prevalent in the Global South. It demonstrates that the emotional experience of poverty, with its attendant social and psychological costs, is surprisingly similar despite marked differences in material well-being and varied cultural traditions and political systems. In so doing, the volumes provide a foundation for a more satisfactory global conversation about the phenomenon of poverty than that which has hitherto been frustrated by disagreement about whether poverty is best conceptualised in absolute or relative terms. The volume draws on the ground-breaking research of an international team: Grace Bantebya-Kyomuhendo, Elaine Chase, Sohail Choudhry, Erika Gubrium, Ivar Lødemel, JO Yongmie (Nicola), Leemamol Mathew, Amon Mwiine, Sony Pellissery and YAN Ming. **Sidewalk** Mitchell Duneier 2001 Presents the lives of poor African-American men who make their subsistence wages by selling used goods on the streets of Greenwich Village in New York; and discusses how they interact with passing pedestrians, police officers, and each other.

The Cultural Territories of Race Michèle Lamont 1999-05-15 Even as America becomes more multiracial, the black-white divide remains central to understanding many patterns and tensions in contemporary society. Since the 1960s, however, social scientists concerned with this topic have been reluctant to discuss the cultural dimensions of racial inequality—not wanting to "blame the victim" for having "wrong values." The Cultural Territories of Race redirects this research tendency, employing today's more sophisticated methods of cultural analysis toward a new understanding of how cultural structures articulate the black/white problem. These essays examine the cultural territories of race through topics such as blacks' strategies for dealing with racism, public categories for definition of race, and definitions of rules for cultural memberships. Empirically grounded, these studies analyze divisions among blacks according to their relationships with whites or with alternative black culture; differences among whites regarding their attitudes toward blacks; and differences both among blacks and between blacks and whites, in their cultural understandings of various aspects of social life ranging from material success to marital life and to ideas about feminism. The essays teach us about the largely underexamined cultural universes of black executives, upwardly mobile college students, fast-food industry workers, so-called deadbeat dads, and proponents of Afrocentric curricula. The Cultural Territories of Race makes an important contribution to current policy debates by amplifying muted voices that have too often been ignored by other social scientists. The Shame Game O'Hara, Mary 2020-02-27 What does it mean to be poor in Britain and America? For decades the primary narrative about poverty in both countries is that it has been caused by personal flaws or 'bad life decisions' rather than policy choices or economic inequality. This misleading account has become deeply embedded in the public consciousness with serious ramifications for how financially vulnerable people are seen, spoken about and treated. Drawing on a two-year multi-platform initiative, this book by award-winning journalist and author Mary O'Hara, asks how we can overturn this portrayal once and for all. Crucially, she turns to the real experts to try to find answers - the people who live it.

Newman has also provided a new preface and a supplementary bibliography.

It covers such common topics as punishment, cooperation, boundaries, testing, tantrums, hitting, and more. The Refusal of Work David Frayne 2015-11-15 Paid work is absolutely central to the culture and politics of capitalist societies, yet today's work-centred world is becoming increasingly hostile to the human need for autonomy, spontaneity and community. The grim reality of a society in which some are overworked, whilst others are condemned to intermittent work and unemployment, is progressively more difficult to tolerate. In this thought-provoking book, David Frayne questions the central place of work in mainstream political visions of the future, laying bare the ways in which economic demands colonise our lives and priorities. Drawing on his original research into the lives of people who are actively resisting nine-to-five employment, Frayne asks what motivates these people to disconnect from work, whether or not their resistance is futile, and whether they might have the capacity to inspire an alternative form of development, based on a reduction and social redistribution of work. A crucial dissection of the work-centred nature of modern society and emerging resistance to it, The Refusal of Work is a bold call for a more humane and sustainable vision of social progress.

Sewing Women Margaret M. Chin 2005-05-25 Many Latino and Chinese women who immigrated to New York City over the past several decades found work in the garment industry—an industry well known for both hiring immigrants and its harsh working conditions. In the 1990s, the garment industry was one of the largest immigrant employers in New York City and workers in Chinese- and Korean-owned factories produced 70 percent of all manufactured clothing in New York City. Based on extensive interviews with workers and employers, Margaret M. Chin offers a detailed and complex portrait of the work lives of Chinese and Latino garment workers. Chin, whose mother and aunts worked in Chinatown's garment industry, also explores how immigration status, family circumstances, ethnic relations, and gender affect the garment industry workplace. In turn, she analyzes how these factors affect whom employers hire and what wages and benefits are given to the employees. Chin's study contrasts the working conditions and hiring practices of Korean- and Chinese-owned factories. Her comparison of the two practices illuminates how ethnic ties both improve and hinder opportunities for immigrants. While both sectors take advantage of workers and are characterized by low wages and lax enforcement of safety regulations—there are crucial differences. In the Chinese sector, owners encourage employees, almost entirely female, to recruit new workers, especially friends and family. Though Chinese workers tend to be documented and unionized, this work arrangement allows owners to maintain a more paternalistic relationship with their employees. Gender also plays a major role in channeling women into the garment industry, as Chinese immigrants, particularly those with children, tend to maintain traditional gender roles in the workplace. Korean-owned shops, however, hire mostly undocumented Mexican and Ecuadorian workers, both male and female. These workers tend not to have children and are thus less tied to traditional gender roles. Unlike their Chinese counterparts, Korean employers hire workers on their own terms and would rather not allow current employees to influence their decisions. Chin's work also provides an overview of the history of the garment industry, examines immigration strategies, and concludes with a discussion of changes in the industry in the aftermath of 9/11.

Chutes and Ladders Katherine S. Newman 2006 Now that the welfare system has been largely dismantled, the fate of America's poor depends on what happens to them in the low-wage labor market. In this timely volume, Katherine S. Newman explores whether the poorest workers and families benefited from the tight labor markets and good economic times of the late 1990s. Following black and Latino workers in Harlem, who began their work lives flipping burgers, she finds more good news than we might have expected coming out of a high-poverty neighborhood. Many adult workers returned to school and obtained trade certificates, high school diplomas, and college degrees. Their persistence paid off in the form of better jobs, higher pay, and greater self-respect. Others found union jobs and, as a result, brought home bigger paychecks, health insurance, and a pension. More than 20 percent of those profiled in Chutes and Ladders are no longer poor. A very different story emerges among those who floundered even in a good economy. Weighed down by family obligations or troubled partners and hindered by poor training and prejudice, these "low riders" moved in and out of the labor market, on and off public assistance, and continued to depend upon the kindness of family and friends. Supplementing finely drawn ethnographic portraits, Newman examines the national picture to show that patterns around the country paralleled the findings from some of New York's most depressed neighborhoods. More than a story of the shifting fortunes of the labor market, Chutes and Ladders asks probing questions about the motivations of low-wage workers, the dreams they have for the future, and their understanding of the rules of the game.

Reskilling America Katherine S. Newman 2016-04-19 From Katherine Newman, award-winning author of *No Shame in My Game*, and sociologist Hella Winston, a sharp and irrefutable call to reenergize this nation's long-neglected system of vocational training After decades of off-shoring and downsizing that have left blue collar workers obsolete and stranded, the United States is now on the verge of an industrial renaissance. Companies like Apple, BMW, Bosch, and Volkswagen are all opening plants and committing millions of dollars to build products right here on American soil. The only problem: we don't have a skilled enough labor pool to fill these positions, which are in many cases technically demanding and require specialized skills. A decades-long series of idealistic educational policies with the expressed goal of getting every student to go to college has left a generation of potential workers out of the system. Touted as a progressive, egalitarian institution providing opportunity even to those with the greatest need, the American secondary school system has in fact deepened existing inequalities, leaving behind millions of youth, especially those who live in the de-industrialized Northeast and Midwest, without much of a future at all. We can do better, argue acclaimed sociologists Katherine Newman and Hella Winston. Taking a page from the successful experience of countries like Germany and Austria, where youth unemployment is a mere 7%, they call for a radical reevaluation of the idea of vocational training, long discredited as an instrument of tracking. The United States can prepare a new, high-performance labor force if we revamp our school system to value industry apprenticeship and rigorous technical education. By doing so, we will not only be able to meet the growing demand for skilled employees in dozens of sectors where employers decry the absence of well trained workers -- we will make the American Dream accessible to all.

The Making of the October Crisis D'Arcy Jenish 2020-10-06 A definitive, mind-changing history of the October Crisis and the events leading up to it, publishing in paperback for the 50th anniversary of the Crisis. The first bombs exploded in Montreal in the spring of 1963, and over the next seven years there were hundreds more bombings, many bank robberies, six murders and, in October 1970, the kidnappings of a British diplomat and a Quebec cabinet minister. The perpetrators were members of the Front de libération du Québec, dedicated to establishing a sovereign and socialist Quebec. Half a century on, we should have reached some clear understanding of what led to the October Crisis. Instead, too much attention has been paid to the Crisis and not enough to the years preceding it. Most of those who have written about the FLQ have been ardent nationalists, committed sovereigntists or former terrorists. They tell us that the authorities should have negotiated with the kidnappers and contend that Jean Drapeau's administration and the governments of Robert Bourassa and Pierre Trudeau created the October Crisis by invoking the War Measures Act. Using new research and interviews, D'Arcy Jenish tells the complete story--starting from the spring of 1963. This gripping narrative by a veteran journalist and master storyteller will change forever the way we view this dark chapter in Canadian history.

Shame & Guilt Jane Middelton-Moz 2020-08-30 "It is my feeling that debilitating shame and guilt are at the root of all dysfunctions in families," says Jane Middelton-Moz. A few common characteristics of adults shamed in childhood: You may suffer extreme shyness, embarrassment and feelings of being inferior to others. You don't believe you make mistakes, you believe you are a mistake. You feel controlled from the outside and from within. You feel that normal spontaneous expression is blocked. You may suffer from debilitating guilt; you apologize constantly. You have little sense of emotional boundaries; you feel constantly violated by others; you frequently build false boundaries. If you see yourself in any of these characteristics, you can learn how shame keeps you from being the person you were born to be and how to change that. *Shame And Guilt* describes how debilitating shame is created and fostered in childhood and how it manifests itself in adulthood and in intimate relationships. Through the use of myths and fairytales to portray different shaming environments, Dr. Middelton-Moz allows you

Downhill from Here Katherine S. Newman 2019-01-15 A sharp examination of the looming financial catastrophe of retirement in America. As millions of Baby Boomers reach their golden years, the state of retirement in America is little short of a disaster. Nearly half the households with people aged 55 and older have no retirement savings at all. The real estate crash wiped out much of the home equity that millions were counting on to support their retirement. And the typical Social Security check covers less than 40% of pre-retirement wages—a number projected to drop to under 28% within two decades. Old-age poverty, a problem we thought was solved by the New Deal, is poised for a resurgence. With dramatic statistics and vivid portraits, acclaimed sociologist Katherine S. Newman shows that the American retirement crisis touches us all, cutting across class lines and generational divides. White-collar managers have seen retirement benefits vanish; Teamsters have had their pensions cut in half; bankrupt cities like Detroit have walked away from their commitments to municipal workers. And for Generation X, the prospects are even worse: a fifth of them expect to never be able to retire. Only the vaunted “one percent” can face retirement without fear. Other countries are confronting similar demographic challenges, yet they have not abandoned their social contract with seniors. *Downhill From Here* makes it clear that America, too, can—and must—do better.

In the Arms of Baby Hop Kenny Attaway 2006-10-01 Many times in my adult life, I have had what I would call an "awake out-of-body experience." During these times, I was peaking in at my life in a dream state; thinking this cannot be my life. I found myself asking the questions of what happened to the child who outsmarted the world and what happened to the teen who had all the answers and confidence to boot, and the young adult who never settled for can't. Well, somewhere along the way, the only thing left of who I was once was, were just shreds of an almost non-existent life. Now, don't get me wrong, there were some good times along the way, but it certainly was not always smooth sailing. But what came later in life was no comparison to the early years. Not that long ago, my life was filled with disappointment, brokenness, worry, anxiety, and fear. I survived breakups and breakdowns, sadness and pain, grief and loss beyond description, all of which led to a one-way ticket to Depression Central. Getting off the road to depression was very difficult for me, but there is no job too hard for God. If you can relate to the paralyzing despair that I went through, then please know that I fellowship with you and understand the grip depression and anxiety can have on your life. However, I want you to know that your destination does not have to be a one-way ticket to the land of despair, instead, your journey can bring you to a place of joy and peace if you simply trust and believe in God.

No Shame in My Game Katherine S. Newman 2009-03-04 "Powerful and poignant... Newman's message is clear and timely." --The Philadelphia Inquirer In *No Shame in My Game*, Harvard anthropologist Katherine Newman gives voice to a population for whom work, family, and self-esteem are top priorities despite all the factors that make earning a living next to impossible--minimum wage, lack of child care and health care, and a desperate shortage of even low-paying jobs. By intimately following the lives of nearly 300 inner-city workers and job seekers for two years in Harlem, Newman explores a side of poverty often ignored by media and politicians--the working poor. The working poor find dignity in earning a paycheck and shunning the welfare system, arguing that even low-paying jobs give order to their lives. *No Shame in My Game* gives voice to a misrepresented segment of today's society, and is sure to spark dialogue over the issues surrounding poverty, working and welfare.

My Body Emily Ratajkowski 2021-11-09 INSTANT NEW YORK TIMES BESTSELLER "My Body offers a lucid examination of the mirrors in which its author has seen herself, and her indoctrination into the cult of beauty as defined by powerful men. In its more transcendent passages . . . the author steps beyond the reach of any 'Pygmalion' and becomes a more dangerous kind of beautiful. She becomes a kind of god in her own right: an artist." -Melissa Febos, The New York Times Book Review A "MOST ANTICIPATED" AND "BEST OF FALL 2021" BOOK FOR * VOGUE * TIME * ESQUIRE * PEOPLE * USA TODAY * CHICAGO TRIBUNE * LOS ANGELES TIMES * SHONDALAND * ALMA * THRILLEST * NYLON * FORTUNE A deeply honest investigation of what it means to be a woman and a commodity from Emily Ratajkowski, the archetypal, multi-hyphenate celebrity of our time Emily Ratajkowski is an acclaimed model and actress, an engaged political progressive, a formidable entrepreneur, a global social media phenomenon, and now, a writer. Rocketing to world fame at age twenty-one, Ratajkowski sparked both praise and furor with the provocative display of her body as an unapologetic statement of feminist empowerment. The subsequent evolution in her thinking about our culture's commodification of women is the subject of this book. *My Body* is a profoundly personal exploration of feminism, sexuality, and power, of men's treatment of women and women's rationalizations for accepting that

treatment. These essays chronicle moments from Ratajkowski's life while investigating the culture's fetishization of girls and female beauty, its obsession with and contempt for women's sexuality, the perverse dynamics of the fashion and film industries, and the gray area between consent and abuse. Nuanced, fierce, and incisive, *My Body* marks the debut of a writer brimming with courage and intelligence.

White Fragility Robin DiAngelo 2018-06-26 The New York Times best-selling book exploring the counterproductive reactions white people have when their assumptions about race are challenged, and how these reactions maintain racial inequality. In this "vital, necessary, and beautiful book" (Michael Eric Dyson), antiracist educator Robin DiAngelo deftly illuminates the phenomenon of white fragility and "allows us to understand racism as a practice not restricted to 'bad people' (Claudia Rankine). Referring to the defensive moves that white people make when challenged racially, white fragility is characterized by emotions such as anger, fear, and guilt, and by behaviors including argumentation and silence. These behaviors, in turn, function to reinstate white racial equilibrium and prevent any meaningful cross-racial dialogue. In this in-depth exploration, DiAngelo examines how white fragility develops, how it protects racial inequality, and what we can do to engage more constructively.

No Shame Lea Lis 2020-09-22 Sex-positive parenting begins before your child starts talking. In *Shame-Less: Talking to your kids about sexuality, self-confidence, and healthy relationships*, New York City Psychiatrist Dr. Lea Lis offers a guide to

parents as they seek to help their children through the maze of sexuality and intimate relationships in the 21st century. In clear, straightforward terms, she lays out the groundwork on which parents can help their kids grow up to enjoy positive sexual experiences, and backs up her arguments with data from the most recent surveys and studies of teen sexual behavior. Dr. Lis covers the many issues that may arise as children grow: how to help young children understand personal physical boundaries; the importance of opposite-sex role models in children's lives, what to tell-and not tell-your kids about your own sexual history; and the role of rituals to mark a girl's first period or a boy's passage into manhood. Dr. Lis gives practical pointers on how to help your kids when their relationships run into trouble, how to encourage them to have good relationships with themselves, and how to teach them to flirt and to deal with rejection. *Shame-Less* shows how talking to your kids about sex and encouraging them to keep a dialogue open with you will help them to have positive, joy-filled emotional and sexual relationships as they grow up. This may not always be comfortable, but as Dr. Lis shows throughout this book, talking about sex, love and relationships in a knowledgeable way is essential.

Working-Class Heroes Maria Kefalas 2003-02-17 Chicago's Southwest Side is one of the last remaining footholds for the city's white working class, a little-studied and little-understood segment of the American population. This book paints a nuanced and complex portrait of the firefighters, police officers, stay-at-home mothers, and office workers living in the stable working-class community known as Beltway. Building on the classic Chicago School of urban studies and incorporating new perspectives from cultural geography and sociology, Maria Kefalas considers the significance of home, community, and nation for Beltway residents.

The Missing Class Katherine S. Newman 2007 "This book is ... about the millions of people who hold down two or three jobs ... and struggle to find time to read to their kids ... It's about the people who have made it out of poverty, but for how long? ... Through meticulous research, Katharine and Victor tell the personal stories of nine families ... You'll find yourself rooting, as I did, for each and every one of them. In sharing their lives and struggles, these families have done more to educate than any set of statistics or government report ever could. Policymakers, journalists, think tanks, and people of good conscience everywhere must take notice ... [The Missing Class] is a call to action to change America ... Like other books that transformed our nation, [it] will inspire us to work for ... an America where the family you were born into or the color of your skin never controls your destiny." Book jacket.
