**What is Translation  
History?**-Andrea Rizzi  
2019-07-22 This book presents a dynamic history of the ways in which translators are trusted and distrusted. Working from this premise, the authors develop an approach to translation that speaks to historians of literature, language, culture, society, science, translation and interpreting. By examining theories of trust from sociological, philosophical, and historical studies, and with reference to interdisciplinarity, the authors outline a methodology for approaching translation history and intercultural mediation from three discrete, concurrent perspectives on trust and translation: the interpersonal, the institutional and the regime-enacted. This

book will be of particular interest to students and scholars of translation studies, as well as historians working on mediation and cultural transfer.

**Maintaining Safe Mobility  
in an Aging Society**-David W. Eby 2008-12-22 By 2030, 20 percent of the world's drivers, 60 million in all, will be over the age of 65. Consequently, safe and efficient mobility for older adults is a complex and pressing issue. *Maintaining Safe Mobility in an Aging Society* addresses the complexities surrounding the booming number of aging drivers and practical solutions for sustaining safe transportation for this growing group. This plainspoken resource informs safe mobility discussions on a variety of areas, including: Necessary skills for safe driving and how age affects them Current evidence on how medical conditions and medication hinder driving skills Comprehensive screening description and assessment practices, issues, and tools Sensitive ways to

help older drivers transition into driving cessation Impact of advanced vehicle technology on aging drivers Approaches to strengthening safety-conscious licensing policies Draws the Significant Link Between Mobility and Well Being In addition to discussing how age impacts both the risk and severity of accidents and the link between mobility and well-being, this authoritative work discusses means to achieve safer mobility, including roadway design and community transportation options. Authored by driver safety and awareness experts, it covers psychological and physical changes associated with age (both normal and pathological), including an important but rarely explored aspect of dementia known as wandering behavior. It also addresses the role of emerging technology. Maintaining Safe Mobility in an Aging Society is a concise reference that encompasses an impressive breadth of ready-to-access information. Thorough and systematically organized, it is a groundbreaking and indispensable resource for

those providing services to seniors as well as those responsible for transportation policy and design.

2019-01-31 With the overall topic ?Tradition and Transformation in Ancient Egypt? we tried to invite scholars working in different fields to discuss (dis)continuity of traditions and consequent cultural transformation. The main aim was to stimulate research and an exchange of ideas and to build bridges for a variety of disciplines within Egyptology.0The first impression given by the ancient Egyptian culture is that of continuity and long-lasting stability. In fact, we can observe very different kinds of transformation processes alongside unbroken tradition. These changes are visible in all areas of society: politics, art, language, economy, religion, etc. This volume gives an insight into the research presented and the results of various discussions afterwards.0In the study of ancient cultures and civilizations, the questions about what remains and what is changing are always of great importance. It is the attempt to get a deeper understanding of the life and thinking of our ancestors. Cultural changes are dynamic

processes and can be caused by developments in technology, political and religious ideas or substantial experiences with diverse societies or environmental factors.0Because of this sheer panoply of possible causes, one seeks to understand transformation in ancient Egypt by asking a series of essential questions: what is the nature of a particular change, when and where did it come about, through what agency, for what purpose, which parts of Egyptian society did it affect, and how lasting were its consequences? In order to answer these questions, it is necessary to involve as many different cultural aspects as possible.

by the International Federation for Information Processing (IFIP). In the first part, the reader can find the proceedings of the 9th Human Choice and Computers International Conference (HCC9) organised by the IFIP Technical Committee TC9 on the Relationship Between ICT and Society. The HCC9 part is subdivided into four tracks: Ethics and ICT Governance, Virtual Technologies and Social Shaping, Surveillance and Privacy, and ICT and Sustainable Development. The second part consists of papers given at the Critical Information Infrastructure Protection Conference (CIP) organized by the IFIP Technical Committee TC11 on Security and Privacy Protection in Information Processing Systems. The two parts of the book are introduced by the respective Conference Chairs. Chapter 1 introduces HCC9, providing a short summary of the HCC conference series, which started in 1974, and explaining the overview of HCC9, detailing the rationale behind each of the tracks in this conference. The details related to the papers of each

track are discussed by the Track Chairs in the respective introductions to the specific tracks of HCC9 (Chaps. 2, 10, 16 and 22). Finally, Chap. 22 introduces the CIP part.

### **The Genetics of Aging-**

Edward Schneider 2013-11-11

The Genetics of Aging is divided into several sections in an attempt to provide a logical progression from the level of the genome to the realm of human genetics. The relationship between the

genetic material and aging will be thoroughly explored in the initial chapters. These chapters discuss in depth the various theories that have been proposed for the mechanisms of aging at the molecular level and present data which either support or contradict these hypotheses. Subsequent chapters will deal with the genetics of aging in organisms ranging from paramecium to mammals. The largest section of this volume will be devoted to several important areas in human genetics: human genetic disorders which feature premature aging, the effect of human parental aging on the production of genetically abnormal offspring, the genetics of human longevity, and a review of studies on aging human twins. Over the last few decades genetic technology has provided enormous insight into a number of disciplines. Therefore, in the last few chapters, several genetic approaches to the study of aging are discussed: somatic cell genetics, immunogenetics, and behavioral genetics. As the goal of this volume is to

present a comprehensive examination of the genetics of aging, most chapters are oriented toward general review of their respective areas. It is my hope that this volume will encourage clinical, biological, and behavioral investigators to turn their attention to the genetic aspects of aging as well as to employ genetic technology to obtain further insight into aging processes.

**Hull & Deck Repair**-Don Casey 2008 A fibreglass hull's seamless nature leads many boatowners to conclude that repair must be difficult. But it's not. There is virtually no repair to a fibreglass hull or deck that a motivated owner can't do as well (if not as quickly) as a professional, and in this practical manual, Don Casey gives you all the advice you need to repair and maintain your fibreglass boat. With admirably clear explanations and diagrams, Casey explains how to mend leaks, seal joints, fix cracks and holes, replace portlights, restore a hull's gloss, renew non-slip decks, and deal with keel and rudder damage as

### **The Elements of Boat Strength: For Builders, Designers, and Owners-**

Dave Gerr 1999-08-31 "This work is significant. It is the first to include a method of assessing structural strength in the context of the modern marine environment." -- Commander M. C. Cruder, U.S. Coast Guard Acclaimed author and naval architect Dave Gerr created this unique system of easy-to-use scantling rules and rules-of-thumb for calculating the necessary dimensions, or scantlings, of hulls, decks, and other boat parts, whether built of fiberglass, wood, wood-epoxy composite, steel, or aluminum. In addition to the rules themselves, The Elements of Boat Strength offers their context: an in-depth, plain-English discussion of boatbuilding materials, methods, and

practices that will guide you through all aspects of boat construction. Now you can avoid wading through dense technical engineering manuals or tackling advanced mathematics. The Elements of Boat Strength has all the formulas, tables, illustrations, and charts you need to judge how heavy each piece of your boat should be in order to last and be safe. With this book, an inexpensive scientific calculator, and a pad of paper, you'll be able to design and specify all the components necessary to build a sound, long-lasting, rugged vessel. What reviewers have said about Dave Gerr's books: Propeller Handbook "By far the best book available on the subject."--Sailing "The best layman's guide we've ever read."--Practical Sailor Dave Gerr and International Marine made a complicated topic understandable and put it into a handbook that is easy to use."--WoodenBoat "Without doubt the definitive reference for selecting, installing, and understanding boat propellers."--Royal Navy Sailing Association Journal The Nature of Boats "If you are not nautically obsessed

### **People-Centred Methodologies for Heritage Conservation-**

Rebecca Madgin 2021-05-17 This book presents methodological approaches that can help explore the ways in which people develop emotional attachments to historic urban places. With a focus on the powerful relations that form between people and places,

this book uses people-centred methodologies to examine the ways in which emotional attachments can be accessed, researched, interpreted and documented as part of heritage scholarship and management. It demonstrates how a range of different research methods drawn primarily from disciplines across the arts, humanities and social sciences can be used to better understand the cultural values of heritage places. In so doing, the chapters bring together a series of diverse case studies from both established and early-career scholars in Australia, China, Europe, North America and Central America. These case studies outline methods that have been successfully employed to consider attachments between people and historic places in different contexts. This book advocates a need to shift to a more nuanced understanding of people's relations to historic places by situating emotional attachments at the core of urban heritage thinking and practice. It offers a practical guide for both academics and industry professionals

towards people-centred methodologies for urban heritage conservation.

### **How to Read a Nautical**

**Chart**-Nigel Calder

2002-08-05 The best handbook on chart usage, from one of the most trusted names in boating In 2000, the U.S. government ceased publication of Chart No. 1, the invaluable little book that generations of mariners have consulted to make sense of the complex system of signs, symbols, and graphic elements used in nautical charts. Now Chart No. 1 is not just reborn but expanded and improved in How to Read a Nautical Chart. The demand for a book like this has never been greater. Arranged and edited by Nigel Calder, one of today's most respected boating authors, --and containing four-color illustrations throughout,-- How to Read a Nautical Chart presents a number of original features that help readers make optimum use of the data found in Chart No. 1, including a more intuitive format, crucial background information, international

chart symbol equivalents, electronic chart symbology, and thorough explanations of the practical aspects of nautical chart reading.

### **One Goal**-Amy Bass

2018-02-27 In the tradition of Friday Night Lights and Outcasts United, ONE GOAL

tells the inspiring story of the soccer team in a town bristling with racial tension that united Somali refugees and multi-generation Mainers in their quest for state--and ultimately national--glory. When thousands of Somali refugees resettled in Lewiston, Maine, a struggling, overwhelmingly white town, longtime residents grew uneasy. Then the mayor wrote a letter asking Somalis to stop coming, which became a national story. While scandal threatened to subsume the town, its high school's soccer coach integrated Somali kids onto his team, and their passion began to heal old wounds. Taking readers behind the tumult of this controversial team--and onto the pitch where the teammates vied to become state champions and achieved a vital sense of understanding--ONE GOAL is a timely story about overcoming the prejudices that divide us.

**Tomb Painting and Identity in Ancient Thebes, 1419-1372 BCE**-Melinda K.

Hartwig 2004 *Tomb Painting and Identity in Ancient Thebes, 1419-1372 BCE* examines the style, iconography, and symbolism of painting in all extant private Theban tomb chapels decorated during the reigns of Thutmose IV and Amenhotep III. The book studies the ways in which pictorial imagery functioned on behalf of the dead in the afterlife, presented their identity to the living, and revealed underlying religious developments with important societal implications. Various aspects of the pre-Amarna Theban tomb are explored, from the tomb's purpose as a creative and commemorative vehicle for the deceased to the placement and functional properties of its imagery. The book also discusses the different styles of painting in the chapels of state and religious officials and how these styles reveal workshop organization and "patronage" practices in Thebes. The majority of the book is dedicated to the iconography of the functioning image in the tomb chapel, its reception, and its purpose as a bridge between what was

represented and what was signified, between the mundane and the sacred, and between the living and the dead. Particular attention is paid to the iconography on the "western" back walls of the transverse hall in T-shaped tomb chapels, walls that held aesthetic, cultic, and symbolic significance to the ancient Egyptians. On these walls as well as the northern or southern long wall in rectangular tomb chapels, iconography and text commemorated the deceased's personal and professional identity, projected this identity into the hereafter, and contained key components for the tomb owner's rebirth. The eternal well-being of the deceased was secured through the iconography of gift giving that also mirrored religious trends that permeated society. *Tomb Painting and Identity in Ancient Thebes, 1419-1372 BCE* addresses Theban tomb painting and its underlying creative and commemorative properties as a medium of regeneration, preservation, and display on behalf of the tomb owner and the world of which he was a part.

**New Studies in  
Multimodality**-Ognyan  
Seizov 2017-07-27

Multimodality is one of the most popular and influential semiotic theories for analysing media. However, the application and conceptual anchoring of multimodality often remains geographically and disciplinarily grounded within local systems of thought. *New Studies in Multimodality* combines the expertise of multimodalists from around the globe, offering novel readings and applications of central concepts in multimodality and inviting innovative synergies between previously disparate schools. Combining perspectives from the most actively developing traditions of theory and research, this book progresses from classic concepts to more empirically and practice-motivated contributions. Contributors engage in mutual dialogue to present new theoretical perspectives and compelling applications to a variety of old and new media. Expanding the basis and scope of

multimodality, this volume shows awareness and experience of this field in many disciplines and illustrates how versatile, pervasive and relevant it is for studying today's communication phenomena.

### **Sleep—Wake Disorders**-K.

Meier-Ewert 2013-06-29  
Sleep-wake disorders frequently give rise to severe ailments and varied distresses

in a great number of people in the world, disturbing their physical and mental activities and their social function. Sleep-wake disorders are now classified into a great number of categories according to their clinical features and etiological factors. Patients with sleep-wake disorders are taken care of not only by specialists for such disorders but also by general physicians and specialists of different physical and mental disorders. In the recent years, the nature of sleep and sleep-wake disorders have been intensively studied by investigators belonging to different fields of science including medicine, biology, and psychology in many countries. It is very important for the progress of research that investigators working in the related fields in different countries meet together and exchange their findings and ideas. The Japanese-German International Symposium on Sleep-Wake Disorders was held on October 9-10th, 1996 in the old, beautiful city of Erfurt (Germany). This symposium was organized by Professor Karlheinz Meier-Ewert (Schwalmstadt,

Germany) and Dr. Masako Okawa (Ichikawa, Japan), with support of the German Society of Sleep Research (President at that time, Professor J. H. Peter) and of the Japanese Society of Sleep Research (President at that time, Professor Y. Hishikawa).

### **Mitteleuropa and German Politics**

J. Brechtefeld  
1996-09-11 The revival of the region of east-central Europe known as 'Mitteleuropa' began in Hungary and Czechoslovakia. For Germany, 'Mitteleuropa' became a renewed geopolitical concept. Since 1990 Mitteleuropa has increasingly become a region of German economic engagement. However, German elites failed however to develop a coherent political approach to that region while simultaneously conducting an eclectic Mitteleuropa policy outside a broader framework of foreign policy. This book traces Germany's Mitteleuropa politics and puts them into an historical context and into a framework for future foreign policy.

**GPS for Mariners**-Robert J. Sweet 2003-03-22 GPS For Mariners is a comprehensive guide for recreational boaters to learn how to operate and effectively use today's GPS systems in everyday navigational situations. While all GPS products come with operational manuals and there are books on how to use your GPS for land or aerial navigation, there is very little information available to recreational boaters on how to best utilize their GPS for marine navigation. From learning the history of GPS, discovering the functions of the GPS, understanding basic and advance course-plotting, learning advance navigation with GPS, interfacing a GPS with an autopilot, to using a GPS with electronic charts on a PC, GPS For Mariners includes everything the novice to the more experienced boater should know about their GPS system. GPS For Mariners is the ultimate how-to guide and ready reference leading to GPS proficiency.

**Understanding Boat Design**-Edward S. Brewer 1993-11-22 For new boating enthusiasts--even if they've been at it awhile--there are scores of burning questions. If one boat has a round bottom and another's is veed, what difference does it make in the way they perform? What are the advantages of a cutter rig over a sloop? Why does one

sailor swear by a full keel, while others won't have anything but a fin keel? Why does one powerboat have more flare in its topsides than another? And what is flare? Why do some hull shapes look "right"? How big an engine and propeller will it take to move that powerboat? What elements make a boat safe, or comfortable? Understanding Boat Design has been the place to look for quick, uncomplicated answers since 1971. Founder of the Yacht Design Institute, a highly respected designer for more than 30 years, and a frequent contributor to SAIL, Cruising World, and other magazines, Ted Brewer has again revised his classic primer. This new volume has been greatly expanded and contains information on many aspects of design that were not even thought of twenty years ago.
